

ASSET KEEPER PRO - Starting AKPRO

Activation screen

When starting AKPRO for the first time, the first screen that will be displayed is the Activation screen. If you do not enter a subscription code, then AKPRO will operate in DEMO mode - which allows you to use AKPRO for 30 days, only enter or edit assets when there are 16 or fewer assets entered, and does not allow you to reset for a new year.

If you have not purchased AKPRO, click the "Continue as Demo" button; otherwise, enter your subscription information.
